Enabling agile transformation in the financial industry

What does DevOps really mean for your business? What impact can it have within your cloud migration process?

How can your enterprise overcome regulatory constraints at the time of implementing agile methodologies?

fin:CODE USA brings under the same roof a wide range of DevOps stakeholders representing the whole financial services ecosystem. Discover the latest in agile methods, technologies, tools, and leadership principles and how they will influence the entire value chain within a number of financial sub-industries including banking, insurance, consumer finance or wealth management.

For more information or to book your ticket at the DevOps, continuous delivery and software development event for agile leaders in the financial industry, visit www.fincode-us.com
